## Project Planning Phase Project Planning (Milestones & Activity List)

| Date         | 20 November 2022                      |  |
|--------------|---------------------------------------|--|
| Team ID      | PNT2022TMID49253                      |  |
| Project Name | Smart Fashion Recommender Application |  |

## Remaining tasks (Milestones & Activities) to be completed

| Milestones                                 | Activities                       | Description                                       |
|--|----------------------------------|---|
| Project Development Phase                  | Delivery of Sprint – 1,2,3,4     | To develop the code and submit                    |
|  |                                  | the developed code by testing it                  |
| Setting up App environment                 | Create IBM Cloud account         | Signup for an IBM Cloud                           |
|  |                                  | Account   |
|  | Create flask project             | Getting started with Flask to                     |
|  |                                  | create project                                    |
|  | Install IBM Cloud CLI            | Install IBM Command Line<br>Interface             |
|  | Docker CLI Installation          | Installing Docker CLI on laptop                   |
|  | Create an account in sendgrid    | Create an account in sendgrid. Use the service as |
|  |                                  | email integration to our                          |
|  |                                  | application for sending emails                    |
| Implementing web Application               | Create UI to interact with       | Create UI   |
|  | Application                      | Registration page                                 |
|  |                                  | Login page  |
|  |                                  | <ul> <li>View products page</li> </ul>            |
|  |                                  | Add products page                                 |
|  | Create IBM DB2 & connect with    | Create IBM DB2 service in IBM                     |
|  | python                           | Cloud and connect with                            |
| to be a continue and a circle and a circle | Condenidiote and in a solution   | python code with DB                               |
| Integrating sendgrid service               | Sendgrid integration with python | To send emails form the                           |
|  | python                           | application we need to integrate the Sendgrid     |
|  |                                  | service   |
| Developing a chatbot                       | Building a chatbot and Integrate | Build the chatbot and Integrate                   |
| Developing a charbot                       | to application                   | it to the flask application                       |
| Deployment of App in IBM                   | Containerize the App             | Create a docker image of your                     |
| Cloud                                      |                                  | application and push it to the                    |
|  |                                  | IBM container registry                            |

| Upload image to IBM container | Upload the image to IBM       |
|-------------------------------|-------------------------------|
| registry                      | container registry            |
| Deploy in kubernetes cluster  | Once the image is uploaded to |
|                               | IBM Container registry deploy |
|                               | the image to IBM Kebernetes   |
|                               | cluster                       |

## Finished tasks (Milestones & Activities)

| Milestones              | Activities             | Description   |
|-------------------------|------------------------|---|
| Ideation Phase          | Literature Survey      | Literature survey on the selected project &   |
|                         |                        | information gathering   |
|                         | Empathy Map            | Prepare Empathy map to  |
|                         |                        | capture the user Panis &  |
|                         |                        | Gains, prepare list of  |
|                         |                        | problem statement   |
|                         | Ideation               | Organizing the brainstroming session and prioritise the top 3 ideas based on feasibility & Importance                                   |
| Project Design Phase I  | Proposed Solution      | Prepare proposed solution document which includes novelty, feasibility of ideas, business model, social impact, Scalability of solution |
|                         | Problem Solution Fit   | Prepare problem solution fit document   |
|                         | Solution Architecture  | Prepare solution architecture document  |
| Project Design Phase II | Customer Journey       | Prepare customer journey map to understand the user interactions & experience with the application                                      |
|                         | Functional requirement | Prepare functional & non functional requirement document  |

|                        | Data Flow Diagram          | Prepare Data Flow Diagram    |
|------------------------|----------------------------|------------------------------|
|                        |                            | and user stories             |
|                        | Technology architecture    | Draw the technology          |
|                        |                            | architecture diagram         |
| Project Planning Phase | Milestones & Activity list | Prepare milestones and       |
|                        |                            | activity list of the project |
|                        | Sprint Delivery Plan       | Prepare sprint delivery plan |
